Hoffman FARM SEEDS

A. H. HOFFMAN, Inc. LANDISVILLE, Pa. U. S. Department of Agriculture

March 6, 1952.

To our Farm Friends:

It felt good to get the following letter from H. I. Mower, who has been a Hoffman Customer since way back in 1914: "Here is my order. I am not satisfied with the seed I get here locally. Guess I'm too used to your kind. Best regards."

Through all the years since 1899, the Hoffman policy has been "Nothing but the Best." And it's nice to be told that good seeds are appreciated by you folks who sow them.

From alfalfa to wheat - from the first page to the last, every offering in your new Hoffman catalog (and your new Funk G hybrid booklet too) is top-notch quality. Let's suppose you and your neighbor have equally good soil. And you both plough, fertilize and lime the same. Plant and cultivate the same days. When harvest time comes, who'll make the biggest profit from his efforts?

I think you'll agree, the man who used the best seed will come out ahead. That's the kind of seed that awaits you here. Every bag is truly "Dependable for Better Crops."

Your order will surely be appreciated. Thank you!

President

NEW "Pennscott" strain . . . heavy-cropping RED CLOVER

Just arrived. Small quantity. Excellent quality. Whenever Lancaster County farmers could get this local Scott strain clover, they would produce better stands than from other types. Never was there enough Scott seed. Two years ago, we sent some to Idaho for multiplication. It has been carefully supervised. Here's that product for you who will

order instantly. The name "Pennscott" has been given to this strain. Costs a slight premium. Certainly worth its cost. In Pennsylvania tests, outyielded all others. Outstanding in so-called 'bad' clover years.

"Kenland" RED CLOVER

Finest "KENLAND" (Certified). Popular disease-resistant strain. Top-quality. Heavy demand. Supply going fast. Stocks still include some Hoffman Extra-quality regular red-clover . . . which has been pleasing thousands of you thru many years.

CLOVERS...TIMOTHY

SEEDS THAT WILL PAY YOU

No sense wasting time or money on any but the finest . . . the crop is too important!

Let these two books guide your seed-buying. Should you have mislaid either, may we send a duplicate? They offer dependable seeds . . . proven so by actual use. Avoid uncertainties . . . depend on these offerings.

Start right for top crops this coming year. It's the crop that counts! And the sweetness of low-price seed can never offset the bitterness of a poor crop.

MONEY-BACK terms and complete conditions — Catalog page 23.

FREIGHT PAID by Hoffman . . . when — shipments weigh 100 pounds or more, to Railroad freight stations in either — Pa., N. J., Md., N. Y., West Va., Del., Conn., Va., Ohio, R. I., or Mass. This does not apply to Seed Potatoes, which are shipped 'charges collect'.

BAGS supplied FREE. Today's bag cost is terrific. Yet you must not figure 'extra' for the bags needed to bring you Hoffman Seeds. (Note — Customers asking to have seeds sent by Mail or Express will be expected to bear the shipping costs.)

HOW TO PAY

Most folks send their check with order. Thus no extra fee or cost is involved. Folks who prefer to pay their Freight Agent when seed arrives, are charged a 'collection-fee' by the railroad.

Here's an idea. Two different Iowa seedsmen told us about it. The practice is growing fast among their farm customers. Folks who plant an early crop —like peas, for instance . . . (and you might have such a place in your plans) plant alfalfa along with them . . . non-winter-hardy alfalfa. So after the early crop is off, the alfalfa comes along and takes over. Makes extra heavy top-growth that same summer. More hay per acre they claim, than from their winter-hardy strains. They don't expect the alfalfa to carry through the winter (sometimes it does). But they've had an excellent extra tonnage of the finest hay—quick. And the benefits from the legume plants on their ground. We have some of this Arizona alfalfa seed for you folks wishing to try it. Price is low!

"Bumper-crop" Hay Blend: Here's a good combination—at a saving in cost. Contains over half Red Clover (25%) and Alfalfa (27%). Plus Alsike (13%), Timothy (18%), Orchard (14%). With 3% Ladino Clover! Beside its hay value, consider the pastureage possible here, after the hay is harvested. Some folks have practiced this formula. Here it is offered outright for the first time—and recommended. Order it as "Bumper-Crop" Blend . . . not on price-list, but quoted at 44c lb.

OAT-STRAINS that yield MORE BUSHELS

An extra, 6, 8, or 10 bushels from each acre counts fast! It's a profit you might as well get. Let these strains help you:

"CLINTON ELEVEN" (Certified)

Most popular, leading producer on many hundreds of eastern and northern farms. For past several years has made higher yields than the original Clinton type. And in fact a number of other varieties once thought to be of equal ability. "Clinton 11" is a great fighter against diseases that used to take heavy tolls. Tillers well. Good strong straw. Does not shatter. Ripens in good time. Thin

Famous "Northwest," the AL-FALFA sown by most Hoffman patrons through many years. Vigorous, long-life, prolific. Here for you now. Also Grimm type. And the newer disease-resistant strains, the "Buffalo," "Ranger," "Atlantic." Whatever your selection, you'll get Quality, Dependable seed!

Hundreds each year buy Hoffman "Economical Mixture" and get fine hay crops from it . . . Composed of about half red clover, quarter alsike, quarter timothy—as catalog says in more detail, page 5. —please note.

Yellow Blossom Sweet Clover has gained many friends. Does not grow so tall, or its stems as woody. Thrives most anywhere. Good as emergency hay, or lasting pasture. Fine soil improver. Cost is low.

Many, many more folks have new profits by their use of Ladino, the miracle pasture legume. It helps the other grasses growing along with it to do a better job. This year, splendid quality, true-strain Ladino seed costs less—both in regular and certified seed. Ladino lasts when other grasses often fail. Great root-system. Hardy. Wonderful what a pound-per-acre seeding accomplishes.

Quality of the timothy-seed crop was generally good this past harvest . . . the owners of many acres combined their crop before ready. Result—poor germination. Avoid "bargain" offers on timothy seed. Top-quality Hoffman "Farmers-Choice" seed is not costly . . . and results are sure.

Never before such a call for Birdsfoot Trefoil seed. From new areas. Fine in hay mixtures. Grows in spots once thought too poor for other legumes to succeed. Catalog gives details, page 16.

Hoffman-quality RYEGRASS sells rapidly these days. Wise planners use it for many purposes. To help stop soil erosion. Provide green-manuring crop. Make quick emergency pasture. It's a must at last cultivation of the cornfields. Very helpful after potato-crop is dug. Widely used in gardens. Figure your needs, order now. Price reasonable.

Gaining More Friends every year-on MERIT

FUNK G Hybrid Seed

Yes, more folks planted FUNK G seed this past season than ever before. The one main reason is, IT PAYS THEM BETTER! And that news spreads. If you require a strain to come off early . . . maybe another to produce your main crop, and be partly used in the silo . . . or for your ensilage only, that's highest in feed-units—here are Funk G strains for you that will do your special job in finest shape! It has taken years for the Hoffman-Funk team of true-research workers to get today's great Funk-G strains in readiness. But they're waiting to do your job, right now. And really do it better! There's so much difference in hybrids. No competitive hybrids have such thorough backing, in your favor, as today's great Funk G strains.

Let us help you get your corn acres into their highest possible production . . . so they can turn out YOUR most bushels of sound mature corn and greatest tonnage of most-nutritious ensilage. This wealth of 15-years corn-facts-gathering awaits sharing with you. All you need do is "ask and it shall be given unto you." Do so today!

Mail to A. H. HOFFMAN, Inc., LANDISVILLE (Lancaster County), PA.

NOTE: If we shall select your Funk "G" Hybrid numbers . . . specify whether for husking or silage. Also tell kind of soil, how long your corn season is, when you plant corn, when fall frosts usually come, your elevation above sea level, and variety of husking corn you have been planting.
